

Post-treatment care for Neo-Elite

- Always use a SPF of at least 30 to protect from UVA & UVB.
 - Apply aquaphor 3-4 times daily after treatment of vascular lesions and pigmented lesions for up to 7-10 days.
 - Avoid picking the treatment site or scab (this can lead to scars).
 - Patients may return to their normal daily activities immediately after treatments.
 - A good skincare regimen is a perfect compliment which can enhance results.
 - To achieve the best results, complete the full treatment schedule at the recommended treatment intervals.
-
